RECEIVED

MAR 02 2012

Dear Mr. Cavett

THE DIVISION OF WATER
Pollution Control

On February 23, 2012 Mr. Edward Casavant of my staff called you to determine if your chicken operation was still active. You informed him that the operation was still active, however, in the past the operation was classified as no potential to discharge. In the past a no potential for discharge did not require a permit. This is no longer the case. As to our call I am sending you a notice of intent (NOI) which should be filled in and mailed to the address on the form. Before mailing the form, you need to contact your local NCRS (USDA) office to arrange for a Nutrient Management Plan which should also include a closure statement in case you ever decide to close your operation. A closure statement would state how you would close the operation.

The Division would like to thank you for your time and cooperation in this matter. If you have any questions concerning this matter please contact Mr. Edward Casavant at 423-634-5764. Please send the enclosed NOI and a Nutrient Management Plan to the address on the NOI form.

Sincerely,

Richard D. Urban, Ph. D.

Field Office Manager

Division of Water Pollution Control
